Gaurav Phule

Pune, Maharashtra, 411006
gaurav230605@gmail.com | +91-9579505191 | LinkedIn: gaurav-phule | GitHub: GauravPhule23

Technical Skills

Languages & Frontend: JavaScript (ES6+), TypeScript, HTML5, CSS3, React, TailwindCSS
Backend & Frameworks: Node.js, Express.js, ASP.NET Core, RESTful APIs, Redis, BullMQ, WebSockets
Databases & DevOps: MongoDB, Mongoose, Docker, CompreFace, MediaPipe, Supabase, Cloudinary
Core Concepts: MVC Architecture, OOPs, RBAC, Asynchronous Programming, Server-Sent Events (SSE), DSA

Experience

ConvenioTech Pune, Maharashtra
Software Developer Intern *14 April 2026 – 6 July 2026*
Product: NMMC FireServices

- Engineered an enterprise-grade **Face Recognition Attendance System** using **Docker**, **CompreFace**, and **MediaPipe**, writing native backend **.NET controllers** and data repository layers paired with frontend AJAX pipelines.
- Refactored the platform's core UI, building responsive mobile layouts for the **Permit Application List** and optimizing dashboard metrics and layout card wrappers using **CSHTML**, **CSS**, and **Chart.js**.
- Built and deployed a production-ready interactive chatbot module onto the public civic portal and debugged legacy **WordPress and Node.js-based** hospitality chatbot server incidents.

Projects

Biometric Face Attendance System | *React, Node.js, TS, Docker, CompreFace, MediaPipe* Jun 2026

- Engineered a high-throughput, multi-view face tracking engine using an open-source, self-hosted AI biometric pipeline.
- Developed a React webcam capturing portal that validates and packages **5 precise spatial facial perspectives** (center, left, right, up, down) via image similarity algorithms before processing.
- Built a Node.js backend parsing engine running over Express channels to process facial coordinate inputs securely.

MailSutra (B2B Bulk Email Platform) *[Under Development]* | *TS, Node.js, Redis, BullMQ* Feb 2026

- Architected an asynchronous, horizontal scaling **Producer-Worker** task queue processing network using **Redis** and **BullMQ**.
- Implemented enterprise **AES-256-CBC encryption** configurations running over Node's native **crypto** libraries to protect sensitive third-party SMTP configurations at rest.
- Designed performant MongoDB indexes to deliver instant real-time delivery performance analytics dashboard queries.

SpandanPass (Spiritual Event Ticketing Portal) *[Under Development]* | *TS, React, Node.js, Redis* May 2026

- Controlled transactional concurrency and prevented duplicate seat assignments during high-volume booking spikes by implementing dynamic distributed locking and inventory caching utilizing **Redis**.
- Integrated an escrow payment flow to safely hold user transaction capitals in escrow models until ticket validation vectors cleared backend checkpoints.

Alumni Connection Hub | *Node.js, Express, JWT, Cloudinary* Sep 2025

- Built a secure networking backend API enforcing Role-Based Access Control (**RBAC**) separation patterns for 4 distinct user roles.

QuickCare (Doctor Appointment System) | *Node.js, Express, MongoDB* Jan 2025

- Architected a dual-panel clinic appointment coordination dashboard managing real-time schedule slot mapping fields.

Education

Dhole Patil College of Engineering Pune, Maharashtra
Bachelor of Engineering in Computer Engineering (SPPU) *Jun 2023 – May 2027*

Achievements

- **Smart India Hackathon (SIH):** Led the core college engineering sprint team as Team Lead, securing 1st place in the Internal Hackathon rounds to qualify for National Level selections.
- **DY Patil AlgoHack Fest:** Secured **Rank 21/50** in the intense algorithmic competition finals, competing **single-handedly** against multi-member teams in optimization problem-solving stages.
